Professional Summary

Analytical Computer Science graduate with strong skills in Data Analytics, Machine Learning, and Computer Vision. Proficient in Python, SQL, Power BI, Pandas, NumPy, Scikit-learn, TensorFlow, and OpenCV. Experienced in data preprocessing, exploratory data analysis, visualization, feature engineering, predictive modelling, and deep learning, with a strong foundation in software development.

Technical Skills

Programming Languages: Python, C++, JavaScript,

Data Analysis: MySQL, Power BI, Microsoft Excel, Process Modeling, EDA

AI/ML Frameworks: PyTorch, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib, Hugging Face

CV/DL Frameworks: YOLO, Faster R-CNN, CNNs, Image Classification, Object Detection, Image Segmentation, Transfer Learning

Web & Tools: React.js, MongoDB, Git & GitHub, HTML5, Tailwind CSS

Spoken Languages: Bangla (Native), English (Professional)

Education

Dhaka International University

Bachelor of Computer Science and Engineering

Dhaka, Bangladesh

GPA: 3.43 / 4.00

Work Experience

Research Intern

Elite Research Lab AI

July 2026 - Present

Remote

- Contribute to applied research in Computer Vision and Deep Learning.
- Support experimentation and model development for ongoing research initiatives.

ML Engineer Intern

FlyRank AI

July 2026 - Sept 2026

Remote

- Build momentum and volatility features from a parquet dataset for a client search-ranking pipeline.
- Train a RandomForest model with client-grouped splits (GroupShuffleSplit) to test leakage; top feature: position volatility.
- Use DuckDB for efficient querying and feature engineering over large datasets.

Support Engineer

Softghor Ltd

Aug 2024 - Nov 2024

Dhaka, Bangladesh

- Analyzed 50+ diagnostic logs and performed root-cause analysis on 50+ issues, cutting resolution time by 35%.
- Tracked 30+ bugs with QA, speeding releases by 20%; built FAQs from 15+ ticket categories, cutting repeat support by 40%.

Projects

Delivery Vision MCP | YOLO, MCP, Claude Desktop, Claude Code, Cursor

- Built an MCP server exposing six custom YOLO vision tools to agents in Claude Desktop, Claude Code, and Cursor.
- Tools cover damage severity, parcel count, helmet check, and vehicle type detection.

ShopFlow - MySQL Analytics Project | MySQL 8, SQL, FastAPI

- Built a full-stack e-commerce analytics platform on MySQL 8 with a FastAPI backend and interactive browser dashboard.
- Wrote complex SQL queries for sales, inventory, and customer behavior, turning raw data into decision-ready KPIs.

Bank Churn Intelligence Platform | XGBoost, SHAP, FastAPI, RandomizedSearchCV

- Trained an XGBoost churn model on 5K customers (31% churn rate) with SHAP explainability served via FastAPI.
- Engineered 33 features from 21 raw columns; tuned via 5-fold RandomizedSearchCV over 50 iterations.

CarParts Instance Segmentation | YOLO26-seg, Ultralytics, ONNX, FastAPI

- Built a YOLO26-seg pipeline that masks 23 car-part classes on Carparts-Seg (3,833 images, 20K+ polygon instances).
- Automated training with GPU/CPU fallback, mAP evaluation, and ONNX export; served via FastAPI UI and webcam demo.

RFM Customer Segmentation Engine | Python, Pandas, RFM Analysis

- Built an RFM segmentation pipeline in Python/pandas; top 26% of customers (Champions) drove 63% of revenue.
- Scored recency, frequency, and spend in quintiles (1–5); mapped RFM codes to segments like At Risk and Lost.

Certifications

Software Engineer / Advanced SQL certificate | Certificate of Completion, HackerRank

Sept 2026

Data Foundations with AI | Certificate of Excellence, Grameenphone Academy

Aug 2026

Machine Learning Internship | Certificate of Completion, FlyRank Corp.

Sept 2026

AI Workflows and Agents | Certificate of Excellence, Grameenphone Academy

June 2026

Gen AI and Prompt Engineering | Certificate of Excellence, Grameenphone Academy

June 2026

PyTorch Bootcamp | Certificate of Excellence, OpenCV University

Aug 2026
